ABSTRACT

A statistical profile of Germanna Community College is presented, providing enrollment data for summer 1988, fall 1988, and spring 1989. The report is divided into five sections. Section 1 provides cumulative data for 1981 through 1988 on enrollment by term, including headcount and full-time equivalent (FTE) figures; and gender, full-/part-time, day/night, racial, and on-/off-campus breakdowns. Section 2 includes the following statistics compiled for the 1988-89 academic year: (1) applications and enrollments; (2) educational objectives of unclassified students; (3) credit hours enrolled; (4) student age and average age; (5) enrollment classification by student type, sex, time, race, and in-state or out-of-state residency; (6) credit hours enrolled by campus, program, and time; (7) program enrollments by student type, sex, year, and student attendance; (8) enrollment by major curriculum area; (9) FTE by curriculum; (10) enrollment by time and status by residence; (11) FTE by residence; (12) enrollment by course prefix; (13) class sections offered; (14) off-campus details; and (15) awards and graduates. Section 3 contains unduplicated headcount data by curriculum, race, residence, and age. Section 4 offers comparisons with other colleges in the Virginia community college system in terms of ranked populations, ranked headcounts, comparative penetration rates, ranked penetration rates, penetration rate calculation estimates, and service region enrollments. Finally, section 5 presents graphs illustrating GCC's enrollment history, fall versus spring headcounts, full-time versus part-time enrollments by term, headcount versus FTE for fall and spring terms, and enrollment by age. The Year at a Glance
1988-1989

There have been several requests for a compilation of college statistics and a regular reporting schedule. Although much information is available using the VCCS information system, use of the many reports is often cumbersome. Most, if not all, reports provide only current year information, thus making it difficult to determine year to year changes and to identify trends.

This report is an attempt to establish a format and a timetable for presenting selected activities of the college. If it will serve a purpose, similar reports can be prepared annually and released in the early part of the summer. The format can undergo changes based on the needs of users but the quality of presentation will remain limited to the software and hardware available to the preparer.

The report is divided into five sections. The first section of the report provides cumulative data. The second section addresses the 1988-89 academic year. Section three appears similar to section two but pertains to unduplicated headcounts. Section four offers some comparisons with other colleges in the VCCS and the final section is comprised of assorted graphics. While much more detailed information could have been included, what is presented answers the most frequently asked questions. The selection of data items was entirely subjective and suggestions are solicited as to other data which might be excluded in future reports.

The preparation of this report was possible due to the patience and cooperation of Sandy Borders, Data Processing Technician. Her knowledge of the VCCS information system and her willingness to interpret some strange requests for data were primary factors in the accumulation of the source data. Thank you, Sandy. An additional thank-you is extended to Jerry Slusser for his gentle but recurring prodding to get this project moving.

***Population is 1986 Dept. of Planning & Budget estimate. Although these population numbers are now obsolete, they are used by VCCS for calculating penetration rates.

***In-District headcount is the number of students residing in the College's service region.

***Total headcount includes all students regardless of place of residence.

***A penetration rate of 2.0000 is considered good.
